

FUTURE IS COMING

# COMPANY PROFILE

 [proteoeng.it](http://proteoeng.it)

A company of  MARCHESINI GROUP

Proteo Engineering has been operating for over 40 years in the realisation of industrial automation and electrical systems. It has been one of the first Italian companies to compete according to the industry 4.0 and to attribute them a strategic value for combining productive efficiency with sustainability.

Thanks to its highly qualified young technical team and consolidated know-how, Proteo is the most accredited partner to lead companies to the factory of the future by realising and designing bespoke digital technologies for sustainable products and processes, able to engender competition, engagement, and placement in the international market.

The ecological transition is the core of the Company's business model: substantial investments in research and development allowed it to enter the renewable energy sector with full rights, by offering state-of-the-art and tailor-made products.

Its marked vocation for innovation has fostered Proteo's entrance in industry 5.0 thanks to continuous experimentations: its collaborative technologies are able to optimise many aspects related to logistics, guaranteeing high accuracy and excellent security levels.

Industrial vision  
for tailor made solutions

proteoeng.it

## POWER SYSTEM

# Industrial electrical systems # Integrated management system # Renewable energies

## AUTOMATION SYSTEM

# Impianti di automazione con implementazioni ad alto contenuto tecnologico: controllo di processo, robotica, automazioni industriali complete di hardware e softwares, sistemi automatici di dosaggio/pesatura/trattamento di solidi e liquidi, soluzioni software di raccolta dati/monitoraggio/sistemi MES, gestione stabilimento integrata.

## DIGITALISATION

# High-tech implementation of automation systems: process control, robotics, industrial automation systems complete with hardware and software, automatic systems for dosing/weighing/treatment of liquids e solids, MES/data collection/monitoring software, integrated management system.

## AI

# Advanced mathematics solutions for the analysis of phenomena, solutions, and problems.

## LOGISTICS

# Cobot.
